WORK HISTORY

June 2022 - Current

Dxred Technologies Pvt Ltd - Frontend Developer, Mumbai

Dxred Corporate Website Migration

Objective: Transforming our company website from using jQuery to React components, focusing on creating responsive sign-in/sign-up forms and ensuring consistent design across all devices.

Shifting website functionality from jQuery to React for improved performance and scalability.

- Creating sign-in/sign-up forms using React components for better user interaction.
- Implementing CSS modules to style individual components, ensuring consistent and visually appealing design.
- Develop new user-facing features using React.js
- Troubleshoot, debug and resolve issues related to front-end development

- Optimize components for maximum performance across a vast array of web-capable devices and browsers
- We used modern development practices to enhance performance.

Achievements/Results: Progression

Figma Plugin Development

Objective: Developed a Figma plugin using React and REST API calls to streamline workflow for developers. The plugin verifies user credentials before accessing layer components in Figma designs, allowing users to create content in the CMS directly from Figma.

- Created a Figma plugin using React to improve collaboration between designers and developers.
- Implemented user credential verification to ensure secure access to plugin features using Figma API.
- Enabled plugin functionality to retrieve all layer names present in Figma designs for easy reference.
- Integrated functionality to create content directly in the CMS from Figma, enhancing workflow efficiency.

Achievements/Results: Progression

Classic Home E-Commerce Website

Objective: Improved functionality and user experience of the Classic Home e-commerce website by debugging issues and developing new components using React. Classic Home is a hybrid micro front-end website specializing in home furniture sales.

- Identified and resolved issues across the entire website to enhance performance and usability.
- Developed new components using React to add new features and improve existing ones.
- Contributed to the hybrid micro front-end architecture of the website, ensuring seamless integration and scalability.

Achievements/Results: Contributed to the hybrid micro front-end architecture, ensuring flexibility and scalability for future development.
