**AI Tools:** Cursor AI, Chatgpt, Lovable.

### PROFESSIONAL EXPERIENCE

**Mirabel Technologies , Hyderabad**

**May 2024 - Present**

#### FULL STACK DEVELOPER

- Led the Front-End Development of a high-traffic Email Marketing platform using React.js, focusing on building responsive, scalable, and dynamic user interfaces that improved overall user engagement and satisfaction.
- Delivered new features aligned with client requirements and user feedback.
- Collaborated with cross-functional teams, including QA engineers and sales departments, to facilitate the smooth rollout of new product features.
- Developed modular, reusable code and components following best practices in software development.
- Optimized application performance, improving load times and user experience.
- Utilized Agile methodologies, working in sprints to deliver new features aligned with client requirements and user feedback.
- Created RESTful APIs and Custom Database Scripts: Developed RESTful APIs in Node.js and custom scripts to perform database updates efficiently.
- Full-Stack Bug Fixes: Conducted thorough analysis to identify and resolve critical bugs across both backend and frontend.
- Translated Figma designs into responsive, user-friendly interfaces, ensuring alignment with UI/UX standards.

**UBARO HEALTH FULL STACK DEVELOPER**

- We have successfully developed two projects: a user app project and an admin project. In the user app project, users can conveniently book rooms by accessing detailed information about each room. Additionally, they can view and manage their personal information, including health-related details
- To enhance the user experience, we integrated Google Maps for location-based services. The implementation of React, Redux, ES6, JavaScript, HTML, and CSS ensured a robust and efficient development process.
- Moving on to the admin project, it offers administrative functionalities to manage room bookings. Admins have the authority to accept or reject user requests based on room availability. With this feature, the system ensures that only available rooms are booked, preventing any conflicts or double bookings.
- Collaborated with cross-functional teams, including QA engineers and sales departments, to facilitate the smooth rollout of new product features.
- Developed modular, reusable code and components following best practices in software development.
- Optimized application performance, improving load times and user experience.
- Utilized Agile methodologies, working in sprints to deliver new features aligned with client requirements and user feedback.
- Created RESTful APIs and Custom Database Scripts: Developed RESTful APIs in Node.js and custom scripts to perform database updates efficiently.
- Full-Stack Bug Fixes: Conducted thorough analysis to identify and resolve critical bugs across both backend and frontend.
- Translated Figma designs into responsive, user-friendly interfaces, ensuring alignment with UI/UX standards.

**ECOMMERCE WEBSITE ( FULL STACK DEVELOPER )**

- Creating a Responsive website and managing updates
- Collaborated with cross-functional teams (including designers and backend developers) to implement user interfaces and integrate with backend systems.
- Integrated RESTful APIs to retrieve and display real-time data, improving the platform's interactivity and dynamic content delivery.
- Worked on a Resource Management APP for the manufacturing industry, the application helps to allocate resources and manage.
- Utilized build tools like Webpack, Babel, and package managers (npm or yarn) to optimize and streamline the development workflow.
- Implemented state management using tools like Redux and the Context API, enabling efficient data flow and synchronization throughout the application.

**EDUCATION****Bachelor of Computer Sciences**

June 2018 - Aug 2021

Girraj Government Degree College

- Major in Computer Sciences.

**ADDITIONAL INFORMATION**

- **Languages:** English, Hindi, Telugu.
