- Bootstrap
- Tailwind CSS
- JavaScript
- React
- Express.js
- Node.js
- MongoDB

Soft Skills

- Problem-Solving
- Effective Communication
- Team Collaboration
- Adaptability & Learning Agility

LANGUAGE

- Hindi
- English

PROFILE

A highly motivated and detail-oriented MERN Stack Developer with a strong background in building scalable and efficient web applications. Passionate about contributing to innovative projects, delivering high-quality code, and optimizing web functionalities for seamless performance. Adept at team collaboration and thriving in dynamic environments, ensuring project success through technical expertise and effective communication.

WORK EXPERIENCE

Apna College

Training

- Developed a full-stack Airbnb-inspired application with dynamic property management and user reviews.
- Designed and optimized a MongoDB database for efficient data storage.
- Built secure RESTful APIs using Node.js and Express.js.
- Implemented role-based authentication with Passport.js, allowing property owners to manage listings and users to submit reviews.

UPCL

Internship

- Gained practical experience in electricity distribution systems and metering technologies.
- Observed and assisted in thermal power generation and electrical testing procedures.
- Developed an understanding of power grid operations and safety regulations.

PROJECTS

Weather App

- Created a real-time weather application using HTML, CSS, JavaScript, and Open Weather API.
- Integrated API calls to retrieve live weather updates based on user input.
- Github: <https://github.com/Prateeknegi2501/Weather>

OCHI Design Clone

- Developed a visually appealing OCHI Design-inspired website clone using React.
- Integrated modern animations and UI transitions with Framer Motion.
- Optimized for performance and accessibility to enhance the user experience.
- GitHub: <https://github.com/Prateeknegi2501/ochidesignclone>

Airbnb Clone (Wanderlust)

- Developed a full-stack Airbnb-inspired application with user authentication and property listings.
- Designed a MongoDB-powered database to manage user-generated listings.
- Implemented Passport.js authentication and role-based access control.
- Deployed the application on Render for a seamless hosting experience.
