

Suraj Yadav

Full Stack Developer (MERN)

"Highly competent and driven software developer with knowledge of JavaScript libraries and frameworks, including React JS, Node JS and a strong foundation in HTML5, CSS3, JavaScript programming, as well as current market trends. I'm looking for a challenging role where I can use my technical knowledge, problem-solving skills, code repositories and Agile processes to help a forward-thinking company succeed."

B. Tech

Dr. Ambedkar Institute of Technology for Handicapped, Kanpur Nagar

07/2017 - 07/2021

PERSONAL PROJECTS

Messho Clone [🔗](#)

- Technologies Used: HTML, CSS, Java Script and React JS.
- Developed a full-stack E-commerce site with HTML, CSS, JavaScript, and React JS, inspired by Messho. Replicated key features: search, shopping cart, product filtering, sorting, user authentication, registration, and seamless checkout. LocalStorage used for efficient data storage. The result is a responsive platform mirroring Messho's core functionalities.

Tasks Management System [🔗](#)

- Technologies Used: React JS, Node JS, Express JS and MongoDB.
- Full-stack web development. Designed and implemented a Task Management System, showcasing expertise in CRUD operations, sorting, filtering, categorization, and prioritization. Skilled in React.js, Node.js, Express.js, and MongoDB. Committed to delivering efficient, user-friendly solutions.

WORK EXPERIENCE

Full Stack Developer (MERN)

Webixy Technologies

08/2021 - 11/2023

Achievements/Tasks

- Worked on a US-based Kids brand E-commerce client application as a Full Stack Developer(MERN).
- Developed scalable and efficient backend systems using Node.js and Express.js, ensuring high-performance web applications.
- Designed and maintained MongoDB databases, optimizing data storage and retrieval processes for improved system responsiveness.
- Utilized asynchronous programming and event-driven architecture to handle concurrent requests, ensuring optimal server performance.
- Headed the creation of critical features, such as product Filter and Sort, Infinite Scrolling, and Did you mean? search, Toasts, Wishlist and Favorites, login, registration, and password recovery etc demonstrating expertise in React.
- Developed comprehensive suite of design system components for enhanced reusability encompassing Inputs, Buttons, Search Bar, Navbar, Footer, Header, Modals, Filters using React and CSS.
