## PROJECT

### GO SOLAR WEBSITE:

**This website is based on MERN technology.**

A website that focuses on solar panels can serve a number of different purposes, depending on its goals and audience.

Provide information on solar panel technology

Promote solar panel products and services

Offer resources and tools for consumers

Provide news and analysis on the solar industry

Overall, a GO Solar website can serve many different functions, but all aim to increase awareness and understanding of solar energy and its potential benefits.
