PERSONAL PROJECTS

WHATSAPP CAMPANING

- I focused on the WhatsApp Campaigning project, where I seamlessly integrated WhatsApp Campaigning APIs with the Yugasa Bot Admin Panel. This integration empowered users to send campaigns on WhatsApp through the creation of templates. The technologies employed in the project included Node.js, Express, and MongoDB.

MIJO APP

- My role involved working on REST API in Node.js for both the app and website, utilizing MongoDB for the database

WALLET IMPLEMENTATION

- I contributed to the internal development team, accomplishing tasks such as implementing a wallet using the cashfree payment gateway and completing various other assignments. For the wallet project, I created a comprehensive system wherein users can add funds, purchase subscriptions, and view their entire transaction history

WTP

- My role involved working on REST API in Node.js for both the app and website, utilizing MongoDB for the database

EMD APP

- My role involved working on REST API in Node.js for both the app and website, utilizing MongoDB for the database

YOUGUS

- My role involved working on REST API in Node.js for both the app and website, utilizing MongoDB for the database
