EXPERIENCE

Datavizz

Ahmedabad, India

Frontend Developer

Jan 2025 – Present

- Developed a multi-lingual and back-stage module using React.js and Axios for API calls.
- Created user forms with validation to ensure proper data entry and smooth user interaction.
- Implemented Redux hooks for global state management across the application.
- Ensured responsive design and optimal user experience using Material-UI for components.

Tablesprint Technologies

Bangalore, India

Associate Software Developer

April 2024 – Aug 2024

- Analyzed business requirements and participated in technical design and development of the project.
- Developed user interfaces and navigation structure using React.js, TailwindCSS, and Elstar components for an interactive experience.
- Implemented client-side validations in forms using Formik and integrated Redux for global state management
- Extensively worked with libraries like react-router-dom, axios, redux, tenstack-table, lodash and react-grid-layout to enhance functionality and UI.
- Created a dynamic table interface to display JSON data with pagination, using tenstack-table for infinite scrolling and cell-dependent tables.
- Optimized application performance with React hooks like useMemo and useRef, improving response times.
- Created REST APIs for service creation, ensuring proper integration with frontend components.

NWS Soft Consulting

Pune, India

Associate Software Engineer

Mar 2022 - April 2024

- Created user forms with validation to ensure proper data entry and smooth user interaction.
- Created user friendly and responsive ui using css and material ui for mobile and desktop view.
- Worked on pdf generator using pdf maker package
- Used dom manipulation technique to create dynamic ui using javascript.
